Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/760,062	Applicant(s) SHANKAR ET AL.	
	Examiner Brian S. Kwon	Art Unit 1614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-32, drawn to a process of modulating an Edg-7 receptor mediated biological activity with piperidine or pyridine compounds when X is N, classified in class 514, subclass 315.
 - II. Claims 1, 3-27 and 29-32, drawn to a process of modulating an Edg-7 receptor mediated biological activity with pyran compounds when X is O, classified in class 514, subclass 452.
 - III. Claims 1, 3-27 and 29-32, drawn to a process of modulating an Edg-7 receptor mediated biological activity with phenyl compounds when X is C, classified in class 514, subclass 646.
 - IV. Claims 1 and 3-32, drawn to a process of modulating an Edg-7 receptor mediated biological activity with benzothio- compounds when X is S, classified in class 514, subclass 432.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

2. In addition, applicant is required under 35 U.S.C. 121 to elect a single disclosed species of (i) compound (e.g., compound 101) and (ii) disease condition (e.g., cancers) under the instant claims of the elected Group. Moreover, whatever specific compound and disease condition are ultimately elected, applicants are required to list all claims readable thereon. With the election of a specific exemplified compound(s) and disease(s),

Art Unit: 1614

a generic concept will be identified by the examiner as the inventive group for examination.

For instance, each of the species of disease conditions (e.g., cancers, acute lung diseases, cardiovascular disease and surface epithelial cell injury) recited in the claims is recognized in the art to be distinctive because they would appear to seek results that differ depending on what diseases or conditions is being treated. One practicing the invention of any of the disease conditions (i.e., cancers) would not necessarily be required to practice any of the others (i.e., cardiovascular disease or lung disease).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
